The execution of this asset is required "[OpenCV for Unity](#)" and "[Dlib FaceLandmark Detector](#)".

Features:

- CVVTuberExample(Computer Vision Virtual YouTuber Example) is an example project of controlling 3D humanoid model (Mecanim Humanoid, "[Unity-chan!" Model](#), [VRM Model](#), [Live2DCubism4 Model](#)) using WebCamTexture. You can control the head orientation and the facial expression of the 3D humanoid model using WebCamTexture only.
- The head orientation and face expression are controlled by the following procedure.
 1. **WebCamTextureMatSourceGetter** - Convert WebCamTexture to OpenCV's Mat

- class.
2. **DlibFaceLandmarkGetter** - Detect a face landmark points from OpenCV's Mat class.
 3. **DlibHeadRotationGetter** - Estimate head orientation from face landmark points.
 4. **HeadRotationController** - Control the head orientation of the 3D model using the estimated head orientation.
 5. **HeadLookAtIKController** - Set Animator.SetLookAtPosition() method using the estimated head orientation.
 6. **DlibFaceBlendShapeController** - Control the face BlendShape of the 3D model using the face landmark point.

Basic Examples:

- WebCamTexture CV VTuber Example
- VideoCapture CV VTuber Example

Advanced Examples: (require add-ons setup)

- UnityChan CV VTuber Example
- VRM CV VTuber Example
- Live2DCubism4 CV VTuber Example

Q & A

Q1. HeadLookAtIkController does not work.

A1. Animator is not set to target of HeadLookAtIkController, or IK Pass of Base Layer of AnimatorController is not set to true.

Or AnimatorController is not set in the model's Animator.

Q2. HeadRotationController does not work.

A2. HeadRotationController target is not set. (Usually, set the Bone of the Head part)

Q3. The direction of rotation of HeadLookAtIkController or HeadRotationController is wrong.

A3. Please adjust invertAxis and rotateAxis settings.
